Aditya Yadav

Frontend Developer

Portfolio: Aditya Yadav
github.com/aditya-yadav1176
linkedin.com/in/aditya-yadav117

Passionate about crafting responsive web applications and intuitive user experiences, with a keen interest in product design, usability, and building digital solutions that are simple, impactful, and genuinely useful. Enjoy transforming ideas into well-designed products that balance functionality, accessibility, and user needs.

Education

Bachelor of Engineering in Information Technology, *University of Mumbai*	7.07 CGPA	2023 – 2027
Higher Secondary Certificate Examination, *Maharashtra State Board*	66.33%	2023
Secondary School Certificate Examination, *Maharashtra State Board*	83.80%	2021

Skills

Languages & Tools	HTML, CSS, JavaScript, React.js, Tailwind CSS, TypeScript, Node.js, Python, C, C++, Git, GitHub, Visual Studio Code, Vercel, Figma
Communication	Hindi (native), English (speaking, reading, and writing), Marathi (reading and writing)

Projects

PIGEON – Cross-Device File Sharing Platform (Live) (GitHub) **Sep 2026**

React, TypeScript, Tailwind CSS, FastAPI

- Built a responsive, browser-based file-sharing application for transferring files between phones and computers without requiring user accounts.
- Implemented code-based file sharing, bidirectional transfers, multi-file handling, and file downloads to support cross-device file transfer workflows.
- Manually tested file selection, sharing-code workflows, transfers, and downloads across two clients to verify core application functionality.

Refova – Referral Discovery Platform (Live) (GitHub) **Sep 2026**

React, TypeScript, Tailwind CSS

- Designed the frontend UI, color scheme, and user-facing features for a referral discovery platform focused on usability and intuitive navigation.
- Developed responsive user interfaces for discovering referral opportunities, browsing referral listings, and viewing referral details.
- Applied AI-assisted development tools to implement frontend features and manually tested interface interactions and responsiveness across screen sizes.

Kino – Movie Discovery Platform (Live) (GitHub) **May 2026 – Aug 2026**

React.js, TypeScript, TMDB API

- Built a responsive movie discovery platform using React.js, TypeScript, and TMDB API integration to display trending, popular, top-rated, and upcoming movies.
- Implemented movie search, detailed movie pages, cast information, ratings, and watchlist functionality using browser local storage.
- Manually tested movie discovery, search, and watchlist workflows across devices to verify core functionality and usability.

QR Code Generator (Live) (GitHub) **Jun 2025**

HTML, CSS, JavaScript, QR Code API

- Developed a responsive QR code generator that converts text and URLs into QR codes with an instant preview and downloadable output.
- Implemented QR code generation, image export, and input handling in a lightweight interface for desktop and mobile devices.

Technical Experience

QSkill Virtual Internship Program **Jul 2026 – Aug 2026**

Front-End Development Intern

- Completed a Front-End Development internship focused on building intuitive and highly user-friendly web interfaces.
- Improved practical understanding of UI development, usability, accessibility, and user experience through practical learning.

Activities

- Selected among the **Top 50 teams** from **250+ teams** in InnovGenius Ideathon 2026.
- Participated in **Smart India Hackathon (SIH) 2025**, collaborating on real-world problem statements.
- Participated in **Hacktoberfest 2025** and contributed to open-source projects through GitHub pull requests.
- Participated in national and college-level hackathons, including EY Techathon 6.0, Edith AI Agent Buildathon, Synergy 2.0, Quasar 3.0, and Hackwarts.
