

Passionate about crafting responsive web applications and intuitive user experiences, with a keen interest in product design, usability, and building digital solutions that are simple, impactful, and genuinely useful. Enjoy transforming ideas into well-designed products that balance functionality, accessibility, and user needs.

EDUCATION

Bachelor of Engineering in Information Technology, University of Mumbai	7.07 CGPA	2023 – 2027
Higher Secondary Certificate Examination, Maharashtra State Board	66.33%	2023
Secondary School Certificate Examination, Maharashtra State Board	83.80%	2021

SKILLS

Languages & Tools	HTML, CSS, JavaScript, React.js, Tailwind CSS, TypeScript, Node.js, Python, C, C++, Git, GitHub, Visual Studio Code, Vercel, Figma
Communication	Hindi (native), English (speaking, reading, and writing), Marathi (reading and writing)

PROJECTS

Kino - Movie Discovery Platform (Live) (Code) May 2026 – Jun 2026

React.js, TypeScript, TMDB API

- Developed a movie discovery platform using React.js, TypeScript, and TMDB API integration, enabling users to browse trending, popular, top-rated, and upcoming movies through a responsive interface.
- Implemented advanced search functionality, detailed movie information pages, cast details, ratings, and personalized watchlist management using browser-based local storage.
- Built reusable React components, responsive layouts, and optimized API-driven rendering to improve performance, maintainability, and user experience across devices.

MedTalk - AI Medical Chatbot (Code) Jan 2025 – Apr 2025

Python, Flask, Gemini API

- Developed an AI-powered medical chatbot using Flask and Gemini API to answer healthcare-related queries through natural language conversations and contextual AI-generated responses.
- Integrated voice-input functionality and conversational AI capabilities to improve accessibility, user engagement, and the overall interaction experience.
- Designed services for request processing, API communication, and response generation through a responsive interface.

Real-Time Device Tracker (Live) (Code) Mar 2026

Node.js, Express.js, Socket.IO, Leaflet.js

- Developed a real-time location tracking application using Node.js, Express.js, Socket.IO, and WebSockets for instant synchronization of geolocation data between devices.
- Integrated Leaflet.js maps to visualize live device locations with dynamically updated markers, enabling smooth tracking without requiring page refreshes.
- Implemented bidirectional communication and scalable backend services to support concurrent client connections and continuous real-time location updates.

QR Code Generator (Live) (Code) Jun 2025

JavaScript, QR Code API

- Developed a QR code generation tool that converts text and URLs into downloadable QR codes with instant preview and client-side processing.
- Implemented QR image export functionality through a lightweight, responsive interface optimized for usability across desktop and mobile devices.

TECHNICAL EXPERIENCE

QSkill Virtual Internship Program Jul 2026 – Aug 2026

Front-End Development Intern

- Completed a Front-End Development internship focused on building intuitive and highly user-friendly web interfaces.
- Improved practical understanding of UI development, usability, accessibility, and user experience through practical learning.

ACTIVITIES

- Selected among the **Top 50 teams** from **250+ teams** in InnovGenius Ideathon 2026.
- Participated in **Smart India Hackathon (SIH) 2025**, collaborating on real-world problem statements.
- Participated in **Hacktoberfest 2025** and contributed to open-source projects through GitHub pull requests.
- Participated in national and college-level hackathons, including EY Techathon 6.0, Edith AI Agent Buildathon, Synergy 2.0, Quasar 3.0, and Hackwarts.
